LED Push-button switches/rotary dimmer

- Switches with exceptionally smooth dimming.
- They can also be connected to 200W LEDs without heating problems.
- We use materials from Japan and Taiwan.
- Our products are CE-approved and hold design patents in the US.
(Electronic safety and EMI up to standard).
- Our experienced engineers have developed push-button switches.
- That Feature smoother rotary dimming than most competitors' models.
- AC Input: 100V / 110V/120V / 220V/230V/240V.
- AC Output: (by AC Input) Min 3% ~100%, Max :AC 2A.
- AC power connection: A single Line only, NO power loss.
- Switches support one-way and Two-way connector.
- Smooth dimming is a new mini type by 2013.
- These sensitive switches can be rotated $0^{\circ} \sim 300^{\circ}$.

- ◆ Push on / off, and rotated to adjust the level of light
- ✚ At least 20% of the energy compared to a standard switch
- ✚ The LED lamp up to 3 times more efficient use

life-size: L=53.3mm, D=22mm W=23mm

Specification

LED Push-button switches/rotary dimmer

- Area : ~
- Input : AC 100V/50&60Hz,110V~120v/60Hz,220V~240V/50Hz
- Output : AC ~MAX240V / 2A
- Connection : A single Line only (AC power L Line)
- switches : push-button AC on/off
- rotated Angl : 0^o~300^o
- Safety : CE-approved OK
- Size : L=53.3mm, D=22mm W=23mm
- outer casing : Plastic
- Color : Black
